

# KIG Image Gallery creation tool for Kalaam web sites

KIG is a command line tool.

Open a command prompt at the folder where the gallery photos resides on your computer. (To open a command prompt at the folder, select the folder with the mouse, then hold down shift and right mouse click and select **Open command window here.**)

## Usage

Either type in **kig** and answer the question prompts or type in:

**kig** iso\_site\_code gallery\_id style\_number site\_number

for example

kig ify artifacts 1 222

The files are named:

gallery-**gallery\_id**\_01.jpg and gallery-**gallery\_id**\_01\_thumb.jpg

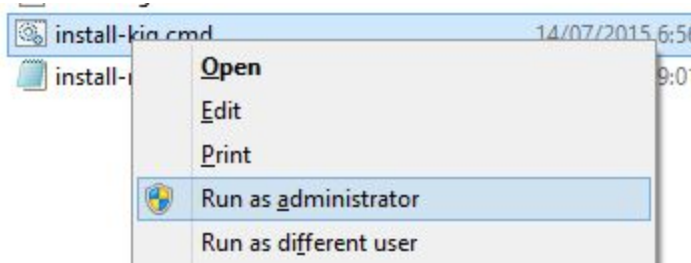

All **JPG** output is created in a subfolder called **readytoupload**. The HTML file **html.txt** is opened in notepad. That file is in the same folder as the source files.

## Installation

Installation notes for install-kig.cmd

Unzip the **ImageGallery.zip**

Right click on the **install-kig.cmd** file and select "**Run as administrator**"

Click **Yes** to the User Account Control.

If you have Irfanview installed it should finish with no warning messages.
